## INTRODUCTION

Record Group 207, Bridge Inspection Reports, Department of Transportation, State of Tennessee, consists of inspection records and photographs conducted during bridge inspections in Tennessee. These records were delivered to the State Library and Archives in 1993 from the Tennessee Department of Transportation for the years 1972-1987. Ms. Martha Carver, TDOT Historic Preservation Specialist Supervisor is the records officer for this division of the Department of Transportation. Ms. Carver continues to send bridge reports to TSLA as they are released from the Department of Transportation.

The original shipment of records consisted of approximately 190 cubic feet of records. The addition to this collection (1997 Accretion) consists of three cubic feet of records. Another addition (2000 Accretion) has added one more cubic feet to these records.

The original records in this collection are maintained at the State Library and Archives. The records in this collection has been microfilmed. The following accretions will be microfilmed as needed.

## SCOPE AND CONTENT NOTE

The Tennessee Department of Transportation, Division of Structures, Bridge Inspection Reports, 1972-2000 consist of approximately 17,500 items. These files are created as a result of the bridge surveys taken by the Division of Structures. Bridge inspection files contain photographs of the bridge and information on the location, approach avenues, structural and mechanical condition. Whenever a bridge in Tennessee is determined to be in poor to critical condition, replacement and destruction is scheduled.

The bridges examined in this collection have been destroyed. These files are the only record that exists for these structures. The files are arranged alphabetically by county. The crossing and road location are also given. For example, the first structure listed, Anderson County, bridge A027-0.38, Coal Creek crossing informs the researcher that the bridge is in Anderson County on Route 027 and spans the Coal Creek at the 0.38 mile marker. For the convenience of the researcher, an index arranged alphabetically by crossing is also provided.

**CONTAINER LIST**  
*Listing by County*

<u>County</u>	<u>Bridge</u>	<u>Crossing</u>	<u>Box</u>
Anderson	A027-0.38	Coal Creek	1
